AC MACHINES

The role of integrated passive components in protecting motor windings p367

ACOUSTICS AND ULTRASONICS

Acoustic noise radiated from direct torque controlled induction motor drives p491
Random slope PWM inverter using existing system background noise: analysis, design and implementation p45

ADAPTIVE CONTROL

Adaptive backstepping control for linear induction motor drive to track periodic references p449
Adaptive sliding-mode control for induction servomotor drive p553

ARTIFICIAL INTELLIGENCE

Robust control of linear synchronous motor servodrive using disturbance observer and recurrent neural network compensator p263

ASYNCHRONOUS MACHINES

Acoustic noise radiated from direct torque controlled induction motor drives p491
Adaptive backstepping control for linear induction motor drive to track periodic references p449
Adaptive sliding-mode control for induction servomotor drive p553
Alternative implementation of vector control for induction motor and its experimental evaluation p7
Autonomous induction generator with single phase rotor p55
Electromagnetic force on a whirling cage rotor p353
Fuzzy robust speed controller for detuned field-oriented induction motor drive p27
Modelling and multivariable control of a gearless, electrically actuated vibrator p345
Multicriterion optimisation approach in the design of a PSC motor p87
Operation of subsea electrical submersible pumps supplied over extended length cable systems p544
Peak-torque performances of saturated and unsaturated asynchronous motors for high-dynamic electric drives p68
Random slope PWM inverter using existing system background noise: analysis, design and implementation p45
Rotor position control for induction machines using diametrical inversion of stator voltage p99
Speed sensorless control performance improvement of induction motor drive using uncertainty cancellation p251
Stator-flux-oriented control of a doubly-fed induction machine with and without position encoder p241
Unity power factor and efficiency control of a voltage source inverter-fed variable-speed induction motor drive p422

CABLES AND OVERHEAD LINES

Operation of subsea electrical submersible pumps supplied over extended length cable systems p544

CAPACITORS

Advanced nonlinear control of three-phase PWM rectifiers p361
Design and implementation of a single phase three-arms rectifier inverter p379
Line-voltage-sensorless active power filter for reactive power compensation p385
The role of integrated passive components in protecting motor windings p367

CIRCUIT THEORY AND DESIGN

Simulation method for DSP-controlled active PFC high-frequency power converters p159

CLOSED LOOP SYSTEMS

DSP-based indirect-current-controlled STATCOM. I. Evaluation of current control techniques p107
DSP-based indirect-current-controlled STATCOM. II. Multifunctional capabilities p113
Phase-locked loop for grid-connected three-phase power conversion systems p213

CONTROL EQUIPMENT

Controller arrangement for boost converter systems sourced from solar photovoltaic arrays or other maximum power sources p15
Modelling and multivariable control of a gearless, electrically actuated vibrator p345
Optimal design of autorecloser electromagnetic actuator p431
Short-stroke, bidirectional linear actuator for high temperature applications p175
Virtual work approach to the computation of magnetic force distribution from finite element field solutions p437

CONTROL SYSTEM ANALYSIS

Adaptive backstepping control for linear induction motor drive to track periodic references p449
Advanced nonlinear control of three-phase PWM rectifiers p361
Alternative implementation of vector control for induction motor and its experimental evaluation p7
Controller arrangement for boost converter systems sourced from solar photovoltaic arrays or other maximum power sources p15
Differential evolution based tuning of fuzzy automatic train operation for mass rapid transit system p206
Fuzzy robust speed controller for detuned field-oriented induction motor drive p27
Robust control of linear synchronous motor servodrive using disturbance observer and recurrent neural network compensator p263
Robust current control for brushless DC motors p503
Rotor speed and position sensorless control of a switched reluctance motor using the binary observer p220
SEPIC derived three-phase switching mode rectifier with sinusoidal input current p286
Simulation method for DSP-controlled active PFC high-frequency power converters p159
Speed sensorless control performance improvement of induction motor drive using uncertainty cancellation p251
Stator-flux-oriented control of a doubly-fed induction machine with and without position encoder p241

CONTROL SYSTEM STABILITY

Active power filters: a review p403
Adaptive backstepping control for linear induction motor drive to track periodic references p449
DC-link voltage boosting and switching control for switched reluctance motor drives p337
Fuzzy robust speed controller for detuned field-oriented induction motor drive p27
Robust control of linear synchronous motor servodrive using disturbance observer and recurrent neural network compensator p263
Robust current control for brushless DC motors p503
Rotor position control for induction machines using diametrical inversion of stator voltage p99
Rotor speed and position sensorless control of a switched reluctance motor using the binary observer p220
Speed sensorless control performance improvement of induction motor drive using uncertainty cancellation p251
Stability and control of inductively coupled power transfer systems p37

CONTROL SYSTEM SYNTHESIS

Adaptive backstepping control for linear induction motor drive to track periodic references p449
Advanced nonlinear control of three-phase PWM rectifiers p361
Alternative implementation of vector control for induction motor and its experimental evaluation p7
Differential evolution based tuning of fuzzy automatic train operation for mass rapid transit system p206
Fuzzy robust speed controller for detuned field-oriented induction motor drive p27
Robust control of linear synchronous motor servodrive using disturbance observer and recurrent neural network compensator p263
Robust current control for brushless DC motors p503
Rotor speed and position sensorless control of a switched reluctance motor using the binary observer p220
Speed sensorless control performance improvement of induction motor drive using uncertainty cancellation p251
Stator-flux-oriented control of a doubly-fed induction machine with and without position encoder p241

DC MACHINES

Robust current control for brushless DC motors p503

DIGITAL FILTERS

Hybrid filter control system with adaptive filters for selective elimination of harmonics and interharmonics p295

DRIVES

Acoustic noise radiated from direct torque controlled induction motor drives p491
Adaptive backstepping control for linear induction motor drive to track periodic references p449
Adaptive sliding-mode control for induction servomotor drive p553
DC-link voltage boosting and switching control for switched reluctance motor drives p337
Fuzzy robust speed controller for detuned field-oriented induction motor drive p27
Modelling and multivariable control of a gearless, electrically actuated vibrator p345
Operation of subsea electrical submersible pumps supplied over extended length cable systems p544
Peak-torque performances of saturated and unsaturated asynchronous motors for high-dynamic electric drives p68
Random slope PWM inverter using existing system background noise: analysis, design and implementation p45
Robust control of linear synchronous motor servodrive using disturbance observer and recurrent neural network compensator p263
Speed sensorless control performance improvement of induction motor drive using uncertainty cancellation p251
The role of integrated passive components in protecting motor windings p367
Unity power factor and efficiency control of a voltage source inverter-fed variable-speed induction motor drive p422

ELECTRIC MACHINES

Adaptive backstepping control for linear induction motor drive to track periodic references p449
Adaptive sliding-mode control for induction servomotor drive p553
Robust control of linear synchronous motor servodrive using disturbance observer and recurrent neural network compensator p263

ELECTROMAGNETIC FIELDS

Railway track transmission line parameters from finite element field modelling: shunt admittance p227

ELECTROMAGNETISM

Stability and control of inductively coupled power transfer systems p37
Virtual work approach to the computation of magnetic force distribution from finite element field solutions p437

ELECTRIC VARIABLES CONTROL

Acoustic noise radiated from direct torque controlled induction motor drives p491
Active power filters: a review p403
Advanced nonlinear control of three-phase PWM rectifiers p361
DC-link voltage boosting and switching control for switched reluctance motor drives p337
Design and implementation of a single phase three-arms rectifier inverter p379
DSP-based indirect-current-controlled STATCOM. I. Evaluation of current control techniques p107
DSP-based indirect-current-controlled STATCOM. II. Multifunctional capabilities p113
Effects of using DC-side average current-mode control on a three-phase converter with an input filter and distorted supply p459
Half-bridge single-phase buck-boost type AC-DC converter with sliding-mode control of the input source current p61
Line-voltage-sensorless active power filter for reactive power compensation p385
Photovoltaic converter system suitable for use in small scale stand-alone or grid connected applications p535
Random slope PWM inverter using existing system background noise: analysis, design and implementation p45
Robust current control for brushless DC motors p503
SEPIC derived three-phase switching mode rectifier with sinusoidal input current p286
Series resonant ZCS-PFM DC-DC converter with multistage rectified voltage multiplier and dual-mode PFM control scheme for medical-use high-voltage X-ray power generator p527
Shunt-excited doubly salient 8/6-switched reluctance machine p391
Stator-flux-oriented control of a doubly-fed induction machine with and without position encoder p241
Unity power factor and efficiency control of a voltage source inverter-fed variable-speed induction motor drive p422
Voltage-injection control for switched-mode power-supply applications p486

ENERGY CONVERSION

Controller arrangement for boost converter systems sourced from solar photovoltaic arrays or other maximum power sources p15
Development of a single-phase half-bridge active power filter with the function of uninterruptible power supplies p313
Photovoltaic converter system suitable for use in small scale stand-alone or grid connected applications p535
Predicting islanding operation of grid connected PV inverters p1
Utility-interactive photovoltaic power conditioning systems with forward converter for domestic applications p199

ENGINEERING COMPUTING

Alternative implementation of vector control for induction motor and its experimental evaluation p7
Controller arrangement for boost converter systems sourced from solar photovoltaic arrays or other maximum power sources p15
Simulation method for DSP-controlled active PFC high-frequency power converters p159

FEEDBACK

Adaptive backstepping control for linear induction motor drive to track periodic references p449
Advanced nonlinear control of three-phase PWM rectifiers p361
Design and implementation of a single phase three-arms rectifier inverter p379
Robust current control for brushless DC motors p503
Rotor position control for induction machines using diametrical inversion of stator voltage p99
Rotor speed and position sensorless control of a switched reluctance motor using the binary observer p220
Simulation method for DSP-controlled active PFC high-frequency power converters p159

FILTERS AND FILTERING

Analysis and design of a novel active power filter configuration p320
Development of a single-phase half-bridge active power filter with the function of uninterruptible power supplies p313

FUZZY CONTROL

Differential evolution based tuning of fuzzy automatic train operation for mass rapid transit system p206
DSP-based indirect-current-controlled STATCOM. I. Evaluation of current control techniques p107
DSP-based indirect-current-controlled STATCOM. II. Multifunctional capabilities p113
Fuzzy robust speed controller for detuned field-oriented induction motor drive p27

INSTRUMENTATION AND MEASUREMENT

Series resonant ZCS-PFM DC-DC converter with multistage rectified voltage multiplier and dual-mode PFM control scheme for medical-use high-voltage X-ray power generator p527

INSULATED GATE FIELD EFFECT TRANSISTORS

New generation 1200 V power module with trench gate IGBT and super soft recovery diode and its evaluations p153

INSULATORS AND INSULATION

Method to observe the change of charges in an electric double layer between pressboard and the insulating oil in a power transformer p83
Neural diagnostic system for transformer thermal overload protection p415

INTEGRATED CIRCUITS

Comparative investigation of the energy recycler for power electronics burn-in test p192

MAGNETIC MATERIALS AND DEVICES

Electromagnetic force on a whirling cage rotor p353
Optimum shapes for multilayered toroidal inductors p75
Short-stroke, bidirectional linear actuator for high temperature applications p175
The role of integrated passive components in protecting motor windings p367

MAGNETIC MEASUREMENT

Electromagnetic force on a whirling cage rotor p353

MATHEMATICAL TECHNIQUES

Line-voltage-sensorless active power filter for reactive power compensation p385
Remote short-circuit current determination in DC railway systems using wavelet transform p520

MEASUREMENT OF SPECIFIC VARIABLES

Electromagnetic force on a whirling cage rotor p353
Method to observe the change of charges in an electric double layer between pressboard and the insulating oil in a power transformer p83

MICROPROCESSORS

Advanced nonlinear control of three-phase PWM rectifiers p361
DSP-based indirect-current-controlled STATCOM. I. Evaluation of current control techniques p107
DSP-based indirect-current-controlled STATCOM. II. Multifunctional capabilities p113
Line-voltage-sensorless active power filter for reactive power compensation p385
Simulation method for DSP-controlled active PFC high-frequency power converters p159
Single-phase active power filter based on three-dimensional current co-ordinates p572

MULTIVARIABLE CONTROL SYSTEMS

Adaptive sliding-mode control for induction servomotor drive p553
Design and implementation of a single phase three-arms rectifier inverter p379
Half-bridge single-phase buck-boost type AC-DC converter with sliding-mode control of the input source current p61
Modelling and multivariable control of a gearless, electrically actuated vibrator p345
Rotor position control for induction machines using diametrical inversion of stator voltage p99
Rotor speed and position sensorless control of a switched reluctance motor using the binary observer p220
Speed sensorless control performance improvement of induction motor drive using uncertainty cancellation p251

NEURAL NETWORKS

Neural diagnostic system for transformer thermal overload protection p415
Robust control of linear synchronous motor servodrive using disturbance observer and recurrent neural network compensator p263

NONELECTRIC VARIABLES CONTROL

Acoustic noise radiated from direct torque controlled induction motor drives p491
Adaptive backstepping control for linear induction motor drive to track periodic references p449
Alternative implementation of vector control for induction motor and its experimental evaluation p7
Fuzzy robust speed controller for detuned field-oriented induction motor drive p27
Robust control of linear synchronous motor servodrive using disturbance observer and recurrent neural network compensator p263
Rotor position control for induction machines using diametrical inversion of stator voltage p99
Rotor speed and position sensorless control of a switched reluctance motor using the binary observer p220
Speed sensorless control performance improvement of induction motor drive using uncertainty cancellation p251
Stator-flux-oriented control of a doubly-fed induction machine with and without position encoder p241

NONLINEAR CONTROL SYSTEMS

Advanced nonlinear control of three-phase PWM rectifiers p361

NUMERICAL ANALYSIS

Electromagnetic force on a whirling cage rotor p353
Optimal design of autorecloser electromagnetic actuator p431
Railway track transmission line parameters from finite element field modelling: shunt admittance p227
Short-stroke, bidirectional linear actuator for high temperature applications p175
Shunt-excited doubly salient 8/6-switched reluctance machine p391
Virtual work approach to the computation of magnetic force distribution from finite element field solutions p437

OPTIMAL CONTROL

Modelling and multivariable control of a gearless, electrically actuated vibrator p345
Unity power factor and efficiency control of a voltage source inverter-fed variable-speed induction motor drive p422

OPTIMISATION

Genetic algorithm and extended analysis optimisation techniques for switched capacitor active filters–comparative study p21
Multicriterion optimisation approach in the design of a PSC motor p87
Optimum shapes for multilayered toroidal inductors p75

OSCILLATORS

Random slope PWM inverter using existing system background noise: analysis, design and implementation p45

PARAMETER ESTIMATION

Applications of describing functions to estimate the continuous and discontinuous conduction mode for a DC-to-DC buck converter p513
Maximum power point tracking with capacitor identifier for photovoltaic power system p497
Robust current control for brushless DC motors p503
Rotor speed and position sensorless control of a switched reluctance motor using the binary observer p220
Speed sensorless control performance improvement of induction motor drive using uncertainty cancellation p251

POWER CONVERTERS

Acoustic noise radiated from direct torque controlled induction motor drives p491
Advanced nonlinear control of three-phase PWM rectifiers p361
Analysis and design of a novel active power filter configuration p320
Applications of describing functions to estimate the continuous and discontinuous conduction mode for a DC-to-DC buck converter p513
Comparative investigation of the energy recycler for power electronics burn-in test p192
Controller arrangement for boost converter systems sourced from solar photovoltaic arrays or other maximum power sources p15
DC-link voltage boosting and switching control for switched reluctance motor drives p337
Design and implementation of a single phase three-arms rectifier inverter p379
Development of a single-phase half-bridge active power filter with the function of uninterruptible power supplies p313
Double-output Luo converters, an advanced voltage-lift technique p469
DSP-based indirect-current-controlled STATCOM. I. Evaluation of current control techniques p107
DSP-based indirect-current-controlled STATCOM. II. Multifunctional capabilities p113
Effects of using DC-side average current-mode control on a three-phase converter with an input filter and distorted supply p459
Half-bridge single-phase buck-boost type AC-DC converter with sliding-mode control of the input source current p61
High frequency PWM technique for two and three level single-phase inverters p181
Maximum power point tracking with capacitor identifier for photovoltaic power system p497
New hybrid parallel active filter configuration minimising active filter size p93
New multilevel rectifier based on series connection of H-bridge cell p304
New ZCS turn-on and ZVS turn-off unity power factor PWM rectifier with reduced conduction loss and no auxiliary switches p146
Novel, three phase, unity power factor modular induction heater p371
Operation of subsea electrical submersible pumps supplied over extended length cable systems p544
Peak-torque performances of saturated and unsaturated asynchronous motors for high-dynamic electric drives p68
Phase-locked loop for grid-connected three-phase power conversion systems p213
Photovoltaic converter system suitable for use in small scale stand-alone or grid connected applications p535
Predicting islanding operation of grid connected PV inverters p1
Random slope PWM inverter using existing system background noise: analysis, design and implementation p45
SEPIC derived three-phase switching mode rectifier with sinusoidal input current p286
Series resonant ZCS-PFM DC-DC converter with multistage rectified voltage multiplier and dual-mode PFM control scheme for medical-use high-voltage X-ray power generator p527
Shunt-excited doubly salient 8/6-switched reluctance machine p391
Simulation method for DSP-controlled active PFC high-frequency power converters p159
The role of integrated passive components in protecting motor windings p367
Three-phase ideal phase shifter using AC choppers p329
Unified theory of extended-period quasiresonant converters p119
Unity power factor and efficiency control of a voltage source inverter-fed variable-speed induction motor drive p422
Utility-interactive photovoltaic power conditioning systems with forward converter for domestic applications p199
Voltage-injection control for switched-mode power-supply applications p486

POWER ELECTRONICS

Comparative investigation of the energy recycler for power electronics burn-in test p192
New generation 1200 V power module with trench gate IGBT and super soft recovery diode and its evaluations p153
New multilevel rectifier based on series connection of H-bridge cell p304

POWER ENGINEERING COMPUTING

Alternative implementation of vector control for induction motor and its experimental evaluation p7
Controller arrangement for boost converter systems sourced from solar photovoltaic arrays or other maximum power sources p15
Multicriterion optimisation approach in the design of a PSC motor p87
Neural diagnostic system for transformer thermal overload protection p415
Predicting islanding operation of grid connected PV inverters p1
Reactive power compensation and load balancing for unbalanced three-phase four-wire system by a combined system of an SVC and a series active filter p563
Remote short-circuit current determination in DC railway systems using wavelet transform p520
Simulation method for DSP-controlled active PFC high-frequency power converters p159
Single-phase switched reluctance motor design p131

POWER SYSTEM CONTROL

Acoustic noise radiated from direct torque controlled induction motor drives p491
Active power filters: a review p403
Adaptive backstepping control for linear induction motor drive to track periodic references p449
Adaptive sliding-mode control for induction servomotor drive p553
Advanced nonlinear control of three-phase PWM rectifiers p361
Alternative implementation of vector control for induction motor and its experimental evaluation p7
Controller arrangement for boost converter systems sourced from solar photovoltaic arrays or other maximum power sources p15
DC-link voltage boosting and switching control for switched reluctance motor drives p337
Design and implementation of a single phase three-arms rectifier inverter p379
DSP-based indirect-current-controlled STATCOM. I. Evaluation of current control techniques p107
DSP-based indirect-current-controlled STATCOM. II. Multifunctional capabilities p113
Effects of using DC-side average current-mode control on a three-phase converter with an input filter and distorted supply p459
Fuzzy robust speed controller for detuned field-oriented induction motor drive p27
Half-bridge single-phase buck-boost type AC-DC converter with sliding-mode control of the input source current p61
Line-voltage-sensorless active power filter for reactive power compensation p385
Modelling and multivariable control of a gearless, electrically actuated vibrator p345
Peak-torque performances of saturated and unsaturated asynchronous motors for high-dynamic electric drives p68
Photovoltaic converter system suitable for use in small scale stand-alone or grid connected applications p535
Random slope PWM inverter using existing system background noise: analysis, design and implementation p45
Robust control of linear synchronous motor servodrive using disturbance observer and recurrent neural network compensator p263
Robust current control for brushless DC motors p503
Rotor position control for induction machines using diametrical inversion of stator voltage p99
Rotor speed and position sensorless control of a switched reluctance motor using the binary observer p220
SEPIC derived three-phase switching mode rectifier with sinusoidal input current p286
Series resonant ZCS-PFM DC-DC converter with multistage rectified voltage multiplier and dual-mode PFM control scheme for medical-use high-voltage X-ray power generator p527
Shunt-excited doubly salient 8/6-switched reluctance machine p391
Simulation method for DSP-controlled active PFC high-frequency power converters p159
Single-phase active power filter based on three-dimensional current co-ordinates p572
Speed sensorless control performance improvement of induction motor drive using uncertainty cancellation p251
Stability and control of inductively coupled power transfer systems p37
Stator-flux-oriented control of a doubly-fed induction machine with and without position encoder p241
Unity power factor and efficiency control of a voltage source inverter-fed variable-speed induction motor drive p422
Voltage-injection control for switched-mode power-supply applications p486

POWER SYSTEM MANAGEMENT

Line-voltage-sensorless active power filter for reactive power compensation p385
Phase-locked loop for grid-connected three-phase power conversion systems p213
Reactive power compensation and load balancing for unbalanced three-phase four-wire system by a combined system of an SVC and a series active filter p563
Simulation method for DSP-controlled active PFC high-frequency power converters p159

POWER SYSTEM PROTECTION

Failure of the London Underground's 22 kV power supply system: An exercise in logic and transport management p273
Predicting islanding operation of grid connected PV inverters p1

POWER SYSTEMS AND APPLICATIONS

Novel, three phase, unity power factor modular induction heater p371

POWER SYSTEMS AND PLANTS

Active power filters: a review p403
Analysis and design of a novel active power filter configuration p320
Comparative investigation of the energy recycler for power electronics burn-in test p192
Controller arrangement for boost converter systems sourced from solar photovoltaic arrays or other maximum power sources p15
Development of a single-phase half-bridge active power filter with the function of uninterruptible power supplies p313
DSP-based indirect-current-controlled STATCOM. I. Evaluation of current control techniques p107
DSP-based indirect-current-controlled STATCOM. II. Multifunctional capabilities p113
Genetic algorithm and extended analysis optimisation techniques for switched capacitor active filters–comparative study p21
Hybrid filter control system with adaptive filters for selective elimination of harmonics and interharmonics p295

Line-voltage-sensorless active power filter for reactive power compensation p385
Maximum power point tracking with capacitor identifier for photovoltaic power system p497
New hybrid parallel active filter configuration minimising active filter size p93
Photovoltaic converter system suitable for use in small scale stand-alone or grid connected applications p535
Predicting islanding operation of grid connected PV inverters p1
Reactive power compensation and load balancing for unbalanced three-phase four-wire system by a combined system of an SVC and a series active filter p563
Single-phase active power filter based on three-dimensional current co-ordinates p572
Utility-interactive photovoltaic power conditioning systems with forward converter for domestic applications p199

POWER TRANSMISSION AND DISTRIBUTION

Active power filters: a review p403
Failure of the London Underground's 22 kV power supply system: An exercise in logic and transport management p273
Genetic algorithm and extended analysis optimisation techniques for switched capacitor active filters–comparative study p21
Hybrid filter control system with adaptive filters for selective elimination of harmonics and interharmonics p295
New hybrid parallel active filter configuration minimising active filter size p93
Reactive power compensation and load balancing for unbalanced three-phase four-wire system by a combined system of an SVC and a series active filter p563
Single-phase active power filter based on three-dimensional current co-ordinates p572
Stability and control of inductively coupled power transfer systems p37
Total apparent power of the electrical system for periodic, deformed waveforms p281

SELF-ADJUSTING SYSTEMS

Adaptive backstepping control for linear induction motor drive to track periodic references p449
Adaptive sliding-mode control for induction servomotor drive p553
Speed sensorless control performance improvement of induction motor drive using uncertainty cancellation p251

SEMICONDUCTOR DEVICE MODELLING

New generation 1200 V power module with trench gate IGBT and super soft recovery diode and its evaluations p153

SEMICONDUCTOR DEVICES

New generation 1200 V power module with trench gate IGBT and super soft recovery diode and its evaluations p153

SENSORS AND ACTUATORS

Adaptive sliding-mode control for induction servomotor drive p553
Effects of using DC-side average current-mode control on a three-phase converter with an input filter and distorted supply p459
Modelling and multivariable control of a gearless, electrically actuated vibrator p345
Optimal design of autorecloser electromagnetic actuator p431

SIMULATION, MODELLING AND IDENTIFICATION

Robust current control for brushless DC motors p503
Rotor speed and position sensorless control of a switched reluctance motor using the binary observer p220
Speed sensorless control performance improvement of induction motor drive using uncertainty cancellation p251

STATISTICAL ANALYSIS

Optimal design of autorecloser electromagnetic actuator p431

SWITCHGEAR

Optimal design of autorecloser electromagnetic actuator p431
Theoretical and experimental study on the opening characteristic of puffer circuit breakers p141

SYNCHRONOUS MACHINES

Aerodynamic losses in switched reluctance machines p443
DC-link voltage boosting and switching control for switched reluctance motor drives p337
Robust control of linear synchronous motor servodrive using disturbance observer and recurrent neural network compensator p263
Rotor speed and position sensorless control of a switched reluctance motor using the binary observer p220
Shunt-excited doubly salient 8/6-switched reluctance machine p391
Single-phase switched reluctance motor design p131
Virtual work approach to the computation of magnetic force distribution from finite element field solutions p437

TRANSFORMERS

Applications of describing functions to estimate the continuous and discontinuous conduction mode for a DC-to-DC buck converter p513
Method to observe the change of charges in an electric double layer between pressboard and the insulating oil in a power transformer p83
Neural diagnostic system for transformer thermal overload protection p415
Optimum shapes for multilayered toroidal inductors p75
Part winding resonance: demerit of interleaved high-voltage transformer winding p167
Reactive power compensation and load balancing for unbalanced three-phase four-wire system by a combined system of an SVC and a series active filter p563
Series resonant ZCS-PFM DC-DC converter with multistage rectified voltage multiplier and dual-mode PFM control scheme for medical-use high-voltage X-ray power generator p527
The role of integrated passive components in protecting motor windings p367

TRANSMISSION LINE THEORY

Railway track transmission line parameters from finite element field modelling: shunt admittance p227

TRANSPORTATION

Differential evolution based tuning of fuzzy automatic train operation for mass rapid transit system p206
Failure of the London Underground's 22 kV power supply system: An exercise in logic and transport management p273
Railway track transmission line parameters from finite element field modelling: shunt admittance p227
Remote short-circuit current determination in DC railway systems using wavelet transform p520
Stability and control of inductively coupled power transfer systems p37
